Author Index

Abdul Hamid, S.B., see Derouane, E.G. 371
Basset, J.-M., see Scott, S.L. 5
Basset, J.-M., see Candy, J.-P. 179
Basset, J.-M., see Shay, T.B. 479
Belgacem, J., Kress, J. and Osborn, J.A.
Catalytic oxidation and ammoxidation of propylene. Modelling studies on well-defined molybdenum complexes 267
Blom, N., see Derouane, E.G. 371
Bönnemann, H., Brijoux, W., Brinkmann, R., Fretzen, R., Joussen, T., Köppler, R., Korall, B., Neiteler, P. and Richter, J.
Preparation, characterization, and application of fine metal particles and metal colloids using hydrotriorganoborates 129
Brijoux, W., see Bönnemann, H. 129
Brinkmann, R., see Bönnemann, H. 129
Buys, I.E., Hambley, T.W., Houlton, D.J., Maschmeyer, T., Masters, A.F. and Smith, A.K.
Models of surface-confined metallocene derivatives 309
Candy, J.-P., Didillon, B., Smith, E.L., Shay, T.B. and Basset, J.-M.
Surface organometallic chemistry on metals: a novel and effective route to custom-designed bimetallic catalysts 179
Choplin, A.
Surface organometallic chemistry on zeolites: A tool for modifying the sorption properties of zeolites 501
Corbin, D.R. and Herron, N.
Designing zeolite catalysts for size and shape selective reactions 343
Derouane, E.G., Abdul Hamid, S.B., Ivanova, I.I., Blom, N. and Højlund-Nielsen, P.-E.
Thermodynamic and mechanistic studies of initial stages in propane aromatisation over Ga-modified H-ZSM-5 catalysts 371
Didillon, B., see Candy, J.-P. 179
Eisen, M.S. and Marks, T.J.
Recent developments in the surface and catalytic chemistry of supported organoactinides 23
Fischer, R.W., see Herrmann, W.A. 243
Fretzen, R., see Bönnemann, H. 129
Gallup, M., see Johnson, B.F.G. 51
Garrone, E., see Zecchina, A. 423
Gates, B.C.
Surface-mediated synthesis of metal clusters 95
Ghiotti, G., see Zecchina, A. 423
Hambley, T.W., see Buys, I.E. 309
Herrmann, W.A., Fischer, R.W., Rauch, M.U. and Scherer, W.
Alkylrhenium oxides as homogeneous epoxidation catalysts: activity, selectivity, stability, deactivation 243
Herron, N., see Corbin, D.R. 343
Højlund-Nielsen, P.-E., see Derouane, E.G. 371
Houlton, D.J., see Buys, I.E. 309
Hsu, L.-Y., see Shay, T.B. 479
Ivanova, I.I., see Derouane, E.G. 371
Johnson, B.F.G., Gallup, M. and Roberts, Y.V.
Molecular clusters as models of metallic catalysts 51
Jolly, S., Saussey, J. and Lavalley, J.C.
FT-IR study of hydrocarbon conversion on dealuminated HY zeolites in working conditions 401
Joussen, T., see Bönnemann, H. 129
Köppler, R., see Bönnemann, H. 129
Korall, B., see Bönnemann, H. 129
Kress, J., see Belgacem, J. 267
Lane, P.D. and Shapley, J.R.
Methanation with $[Re(CO)_3OH]_4/Al_2O_3$. Evidence for spillover species 121
Lavalley, J.C., see Jolly, S. 401
Leconte, M.
An approach to the mechanisms of C–C bond formation and cleavage on metal surfaces using model elementary reaction steps of organometallic chemistry 205
Marks, T.J., see Eisen, M.S. 23
Maschmeyer, T., see Buys, I.E. 309
Masters, A.F., see Buys, I.E. 309
Misono, M., see Mizuno, N. 319

Mizuno, N. and Misono, M.
Heteropolyanions in catalysis 319
Moiseev, I.I., Stromnova, T.A. and Vargaftik, M.N.
Palladium clusters: stoichiometric and catalytic reactions 71
Neiteler, P., see Bönnemann, H. 129
Osborn, J.A., see Belgacem, J. 267
Psaro, R., see Roberto, D. 109
Rauch, M.U., see Herrmann, W.A. 243
Reven, L.
Solid-state NMR studies of supported organometallics 447
Richter, J., see Bönnemann, H. 129
Roberto, D., Psaro, R. and Ugo, R.
Surface organometallic chemistry: reductive carbonylation of $OsCl_3 \cdot 3H_2O$ supported on silica 109
Roberts, Y.V., see Johnson, B.F.G. 51
Sánchez-Delgado, R.A.
Breaking C–S bonds with transition metal complexes. A review of molecular approaches to the study of the mechanisms of the hydrodesulfurization reaction 287
Saussey, J., see Jolly, S. 401
Scherer, W., see Herrmann, W.A. 243
Scott, S.L. and Basset, J.-M.
Stoichiometric and catalytic reactivity of organometallic fragments supported on inorganic oxides 5
Shapley, J.R., see Lane, P.D. 121
Shay, T.B., see Candy, J.-P. 179
Shay, T.B., Hsu, L.-Y., Basset, J.-M. and Shore, S.G.
Application of computer modeling to surface organometallic chemistry 479
Shore, S.G., see Shay, T.B. 479
Smith, A.K., see Buys, I.E. 309
Smith, E.L., see Candy, J.-P. 179
Spoto, G., see Zecchina, A. 423
Stromnova, T.A., see Moiseev, I.I. 71
Ugo, R., see Roberto, D. 109
Vargaftik, M.N., see Moiseev, I.I. 71
Zaera, F.
Molecular approach to the study of the mechanisms of alkyl reactions on metal surfaces 221
Zecchina, A., Spoto, G., Ghiotti, G. and Garrone, E.
Cr^{2+} ions grafted to silica and silicalite surfaces: FTIR characterization and ethylene polymerization activity 423

Subject Index

acidity
FT-IR study of hydrocarbon conversion on dealuminated HY zeolites in working conditions 401
alkane activation
Recent developments in the surface and catalytic chemistry of supported organoactinides 23
alkene isomerization
Palladium clusters: stoichiometric and catalytic reactions 71
alkyl reactions
Molecular approach to the study of the mechanisms of alkyl reactions on metal surfaces 221
allylamido complexes
Catalytic oxidation and ammoxidation of propylene. Modelling studies on well-defined molybdenum complexes 267
allyl complexes
Recent developments in the surface and catalytic chemistry of supported organoactinides 23
allyloxo complexes
Catalytic oxidation and ammoxidation of propylene. Modelling studies on well-defined molybdenum complexes 267
alumina
Methanation with $[Re(CO)_3OH]_4/Al_2O_3$. Evidence for spillover species 121
Application of computer modeling to surface organometallic chemistry 479
ammoxidation
Catalytic oxidation and ammoxidation of propylene. Modelling studies on well-defined molybdenum complexes 267
arenes
Recent developments in the surface and catalytic chemistry of supported organoactinides 23
bimetallic catalysts
Surface organometallic chemistry on metals: a novel and effective route to custom-designed bimetallic catalysts 179
bonds (C–S)
Breaking C–S bonds with transition metal complexes. A review of molecular approaches to the study of the mechanisms of the hydrodesulfurization reaction 287
carbene–palladium cluster
Palladium clusters: stoichiometric and catalytic reactions 71
carbon dioxide insertion
Palladium clusters: stoichiometric and catalytic reactions 71
carboxyl–palladium cluster
Palladium clusters: stoichiometric and catalytic reactions 71
catalysis
Alkylrhenium oxides as homogeneous epoxidation catalysts: activity, selectivity, stability, deactivation 243
Heteropolyanions in catalysis 319
catalytic reactivity
Stoichiometric and catalytic reactivity of organometallic fragments supported on inorganic oxides 5
C–C bond formation/cleavage
An approach to the mechanisms of C–C bond formation and cleavage on metal surfaces using model elementary reaction steps of organometallic chemistry 205
chromium ions
Cr^{2+} ions grafted to silica and silicalite surfaces: FTIR characterization and ethylene polymerization activity 423
computer modeling
Application of computer modeling to surface organometallic chemistry 479
custom design
Surface organometallic chemistry on metals: a novel and effective route to custom-designed bimetallic catalysts 179
cyclohexene conversion
FT-IR study of hydrocarbon conversion on dealuminated HY zeolites in working conditions 401
cytochrome P450
Designing zeolite catalysts for size and shape selective reactions 343
dealuminated HY zeolites
FT-IR study of hydrocarbon conversion on dealuminated HY zeolites in working conditions 401

dehydration
Palladium clusters: stoichiometric and catalytic reactions 71
ethylene
Cr^{2+} ions grafted to silica and silicalite surfaces: FTIR characterization and ethylene polymerization activity 423
Fischer–Tropsch synthesis
An approach to the mechanisms of C–C bond formation and cleavage on metal surfaces using model elementary reaction steps of organometallic chemistry 205
gallium
Thermodynamic and mechanistic studies of initial stages in propane aromatisation over Ga-modified H-ZSM-5 catalysts 371
haemoglobin
Designing zeolite catalysts for size and shape selective reactions 343
hafnium
Models of surface-confined metallocene derivatives 309
heterogeneous catalysis
Recent developments in the surface and catalytic chemistry of supported organoactinides 23
heteropolyanions
Heteropolyanions in catalysis 319
hydrodesulphurization
Breaking C–S bonds with transition metal complexes. A review of molecular approaches to the study of the mechanisms of the hydrodesulfurization reaction 287
hydrogenation
Recent developments in the surface and catalytic chemistry of supported organoactinides 23
hydrotriorganoborates
Preparation, characterization, and application of fine metal particles and metal colloids using hydrotriorganoborates 129
H-ZSM-5
Thermodynamic and mechanistic studies of initial stages in propane aromatisation over Ga-modified H-ZSM-5 catalysts 371
inorganic oxides
Stoichiometric and catalytic reactivity of organometallic fragments supported on inorganic oxides 5
iron–sulphur protein analogues
Designing zeolite catalysts for size and shape selective reactions 343
IR spectroscopy
FT-IR study of hydrocarbon conversion on dealuminated HY zeolites in working conditions 401
magnesia
Application of computer modeling to surface organometallic chemistry 479
MAS NMR
Thermodynamic and mechanistic studies of initial stages in propane aromatisation over Ga-modified H-ZSM-5 catalysts 371
mechanism
Thermodynamic and mechanistic studies of initial stages in propane aromatisation over Ga-modified H-ZSM-5 catalysts 371
mechanisms
Breaking C–S bonds with transition metal complexes. A review of molecular approaches to the study of the mechanisms of the hydrodesulfurization reaction 287
metal clusters
Surface-mediated synthesis of metal clusters 95
metal colloids
Preparation, characterization, and application of fine metal particles and metal colloids using hydrotriorganoborates 129
metallic catalysts
Molecular clusters as models of metallic catalysts 51
metallocenes
Models of surface-confined metallocene derivatives 309
metal particles
Preparation, characterization, and application of fine metal particles and metal colloids using hydrotriorganoborates 129
metal surfaces
An approach to the mechanisms of C–C bond formation and cleavage on metal surfaces using model elementary reaction steps of organometallic chemistry 205

Molecular approach to the study of the mechanisms of alkyl reactions on metal surfaces 221
methanation
Methanation with $[Re(CO)_3OH]_4/Al_2O_3$. Evidence for spillover species 121
MFI
Thermodynamic and mechanistic studies of initial stages in propane aromatisation over Ga-modified H-ZSM-5 catalysts 371
molecular clusters
Molecular clusters as models of metallic catalysts 51
molecularity
Heteropolyanions in catalysis 319
molybdenum
Catalytic oxidation and ammoxidation of propylene. Modelling studies on well-defined molybdenum complexes 267
n-hexane cracking
FT-IR study of hydrocarbon conversion on dealuminated HY zeolites in working conditions 401
nuclear magnetic resonance
Solid-state NMR studies of supported organometallics 447
olefins
Alkylrhenium oxides as homogeneous epoxidation catalysts: activity, selectivity, stability, deactivation 243
organometallic fragments
Stoichiometric and catalytic reactivity of organometallic fragments supported on inorganic oxides 5
organometallics
Solid-state NMR studies of supported organometallics 447
Surface organometallic chemistry on zeolites: A tool for modifying the sorption properties of zeolites 501
osmium
Application of computer modeling to surface organometallic chemistry 479
osmium trichloride
Surface organometallic chemistry: reductive carbonylation of $OsCl_3 \cdot 3H_2O$ supported on silica 109
oxidation
Palladium clusters: stoichiometric and catalytic reactions 71
Alkylrhenium oxides as homogeneous epoxidation catalysts: activity, selectivity, stability, deactivation 243
Catalytic oxidation and ammoxidation of propylene. Modelling studies on well-defined molybdenum complexes 267
palladium cluster catalysis
Palladium clusters: stoichiometric and catalytic reactions 71
polymerization
Cr^{2+} ions grafted to silica and silicalite surfaces: FTIR characterization and ethylene polymerization activity 423
propane aromatisation
Thermodynamic and mechanistic studies of initial stages in propane aromatisation over Ga-modified H-ZSM-5 catalysts 371
propylene
Catalytic oxidation and ammoxidation of propylene. Modelling studies on well-defined molybdenum complexes 267
reductive carbonylation
Surface organometallic chemistry: reductive carbonylation of $OsCl_3 \cdot 3H_2O$ supported on silica 109
rhenium
Methanation with $[Re(CO)_3OH]_4/Al_2O_3$. Evidence for spillover species 121
Alkylrhenium oxides as homogeneous epoxidation catalysts: activity, selectivity, stability, deactivation 243
rhodium
Application of computer modeling to surface organometallic chemistry 479
ruthenium
An approach to the mechanisms of C–C bond formation and cleavage on metal surfaces using model elementary reaction steps of organometallic chemistry 205
shape-selective reactions
Designing zeolite catalysts for size and shape selective reactions 343
silica
Surface organometallic chemistry: reductive carbonylation of $OsCl_3 \cdot 3H_2O$ supported on silica 109
An approach to the mechanisms of C–C bond formation and cleavage on metal surfaces using model elementary reaction steps of organometallic chemistry 205

Cr^{2+} ions grafted to silica and silicalite surfaces: FTIR characterization and ethylene polymerization activity 423
Application of computer modeling to surface organometallic chemistry 479
silicalite
Cr^{2+} ions grafted to silica and silicalite surfaces: FTIR characterization and ethylene polymerization activity 423
silsesquioxane
Models of surface-confined metallocene derivatives 309
size-selective reactions
Designing zeolite catalysts for size and shape selective reactions 343
sorption properties
Surface organometallic chemistry on zeolites: A tool for modifying the sorption properties of zeolites 501
spillover species
Methanation with $[Re(CO)_3OH]_4/Al_2O_3$. Evidence for spillover species 121
support surface chemistry
Application of computer modeling to surface organometallic chemistry 479
surface chemistry
Stoichiometric and catalytic reactivity of organometallic fragments supported on inorganic oxides 5
Molecular approach to the study of the mechanisms of alkyl reactions on metal surfaces 221
Solid-state NMR studies of supported organometallics 447
Surface organometallic chemistry on zeolites: A tool for modifying the sorption properties of zeolites 501
surface-confined metallocene derivatives
Models of surface-confined metallocene derivatives 309
surface-mediated synthesis
Surface-mediated synthesis of metal clusters 95
surface organometallic chemistry
Surface organometallic chemistry on metals: a novel and effective route to custom-designed bimetallic catalysts 179
thermodynamics
Thermodynamic and mechanistic studies of initial stages in propane aromatisation over Ga-modified H-ZSM-5 catalysts 371
thermolysis
Palladium clusters: stoichiometric and catalytic reactions 71
thorium
Recent developments in the surface and catalytic chemistry of supported organoactinides 23
titanium
Models of surface-confined metallocene derivatives 309
transition metal complexes
Breaking C–S bonds with transition metal complexes. A review of molecular approaches to the study of the mechanisms of the hydrodesulfurization reaction 287
zeolite
Thermodynamic and mechanistic studies of initial stages in propane aromatisation over Ga-modified H-ZSM-5 catalysts 371
zeolites
Designing zeolite catalysts for size and shape selective reactions 343
Surface organometallic chemistry on zeolites: A tool for modifying the sorption properties of zeolites 501
zirconium
Models of surface-confined metallocene derivatives 309
